

CNX[®]-200 CABIN NETWORK ACCELERATOR

Cabin Networking

The CNX-200 Cabin Network Router is the most popular cabin gateway unit in the market today – with over 2,000 installations. The CNX-200 provides all necessary cabin network functions with a power source and a web-based interface. A simple GoDirect Routing Software upgrade will be available via a service bulletin in 2017 Q1, which will remove the end of life status of the system and provide the latest GoDirect Cabin Connectivity features. The upgrade program saves costs and provides more information and control for business jet operators.

Key benefits of refreshed CNX-200 with GoDirect Routing Software:

- Xiplink – State-of-art network acceleration technology
- Integrated with Honeywell GoDirect Cabin Connectivity Application – Real time data and information monitoring and control
- Support per device air time billing
- Support Inmarsat Global Xpress (Jet ConneX)
- Mobile IP – Seamless transition among different data links
- Roadmap to the future GoDirect releases

GoDirect Cabin Connectivity gives you the control by providing the tools necessary to put real time data and information at your fingertips.

GoDirect Cabin Connectivity is Honeywell's answer to providing the most flexible, reliable solution for cabin communications. Honeywell now offers a comprehensive suite of satellite communication services and solutions to deliver unparalleled connectivity and functionality.

Stay connected no matter where you are in the world.

ROUTING SOFTWARE FEATURE	HOW IT WORKS	ADVANTAGE TO OPERATOR
MOBILITY	Provides a single IP address to seamlessly migrate across any link available to the aircraft	Ensures data continuity for passengers through all phases of flight
ON DEMAND XSTREAM	Automatically adds/removes streaming and channel bonding sessions to meet passenger demand	Minimizes the cost of the service while maximizing the data rate demanded by passengers
PASSENGER BILLING	Exclusively provides GoDirect Access voucher card and credit card billing services to a passengers device	Enables accurate billing based on an individual passenger's use of the service
ACCELERATION	Provides XpiLink compression and acceleration service, increasing data throughput	Presents the fastest most efficient way to push data to a passenger's device
SSID MANAGEMENT	Configures up to 4 unique SSIDs including hidden SSIDs preconfigured for specific devices	Controls access to the data services to ensure the highest datalinks are available to the most important passengers
GODIRECT NETWORK APP	Integrates with the app to provide crew and passengers with information on network connection, devices connected, speeds and data consumed	Informs passengers and crew and permits control of the connection and permissions for the devices on the network

The GoDirect Advantage

GoDirect is Honeywell's industry-leading portfolio of services and applications that provide business aviation operators, flight crews and maintenance teams with the information they need to control their services and network.

GoDirect Portal	Manage your network and services to balance cost with performance
GoDirect Access	Control aircraft network access and prevent devices from accessing network
GoDirect Filter	Increase bandwidth and improve passenger experience as well as control streaming costs on high speed links.
GoDirect Network App	Control links, devices and services on the aircraft to maximize cabin experience
GoDirect Tool Kit	Simplifies troubleshooting Satcom systems reducing downtime and headaches
Flight Tracking	Maintain constant awareness of your aircraft's location with real time aircraft tracking and position reporting
Weather	Prepare an accurate flight briefing while enjoying your coffee or while on the go with the latest weather information available on our website and mobile apps
Flight Planning	Save time and errors by calculating fast, accurate, flight plans globally using a sophisticated and highly integrated flight planning engine
GoDirect Aircraft Datalink	Travel with ease knowing your safety services and cockpit communications are covered by one of the industry leading datalink providers
